

Thanks for choosing Winwood Decksters™ clip-in pedal adapters. The intended uses for Decksters™ are casual riding, grocery store runs and easy strolls around the neighborhood. We hope you find them to be a versatile, convenient and durable product. Decksters™ work with Time® ATAC, Crank Brothers® Eggbeater, Shimano® SPD, Wellgo®, and Ritchey® off-road style pedals. However, you must follow the instructions to assure proper set up for each brand. Use the correct cleat (sold separately) for the brand of pedal according to each manufacturer's specifications.

IMPORTANT SAFETY WARNING:

Clip-in pedal systems have an inherent release mechanism that allows a quick release of clipless shoes by twisting the shoe. Twisting your foot while it is on a Deckster™ may cause it to release, just as a clipless shoe would. Jumping, stunt riding, downhill, freeriding, BMX-ing, and/or aggressive riding could result in premature release of the Deckster™ from the pedal, potentially causing serious injury.

Bike shop employees please note, you must warn the customer of the release mechanisms inherent in this clipless pedal system if using the Deckster™ for test rides on bicycles.

Installation of the plastic blocks is absolutely necessary for use with Time® ATAC or Crank Brothers® Eggbeater pedals. Failure to install plastic blocks could cause premature release of platform from pedal and result in injury.

Deckster™ assembly:

For TIME® ATAC or Crank Brothers® Eggbeater pedals:

Set cleat plate into holes on top of Deckster™.

Set cleat on bottom of Deckster™.

Lube and install both cleat bolts, torque to 4-5 Nm (35-44 inch-lbs) with 3mm hex wrench.

You must install the plastic blocks with Time® and Eggbeater® pedals. Failure to do so could result in premature release of Deckster™ from the pedal and potentially cause serious injury. Place bolts in plastic block so that each bolt head sits flush into the recessed side of block. Fasten to bottom of Deckster™, tightening to 3 Nm (26 inch lbs.) with 3mm hex wrench.

Time® ATAC or Crank Brothers® Eggbeater assembly

For SPD™-compatible (Shimano®, Wellgo® or Ritchey®) pedals:

Set cleat plate into holes on top of Deckster™.

Set cleat on bottom of Deckster™.

Insert cleat bolt washer into recessed cleat area.

Lube and install both cleat bolts, torque to 4-5 Nm (35-44 inch-lbs) with 3mm hex wrench.

Use of plastic blocks is not necessary for SPD™-type pedals.

Shimano®, Wellgo® or Ritchey® assembly

To install Deckster™ on all pedals:

With pedal properly installed on the bike, place Deckster™ onto the pedal with proper forward cleat direction.

Gently step down onto Deckster™ until the cleat clips into place.

Once securely in place, we recommend tightening the cleat release mechanism to its tightest setting on SPD™-type pedals.

To remove Deckster™ from all pedals:

While pedal is still installed on the bike, loosen cleat release mechanism to its loosest setting on SPD™-type pedals.

Wrap a shop rag around platform to protect your hands. Then twist the platform to release.

Reset cleat release mechanism to desired tension on SPD™-type pedals.

©2003 QBP WINWOOD™ LIMITED 2 YEAR WARRANTY

This product is warranted against defects in materials and workmanship for 2 year, from the original date of retail purchase by the consumer, subject to the limitations detailed below. This warranty is expressed limited to the repair or replacement of the original product, at the option of QBP™, and is the sole remedy of this warranty. This limited warranty applies only to the original purchaser of the QBP™ product and is not transferable. In no event shall QBP™ be liable for loss, inconvenience or damage, whether direct, incidental or otherwise resulting from breach of any express or implied warranty or condition, of merchantability, fitness for a particular purpose, or otherwise with respect to this product except as set forth herein.

This warranty does not cover the following:

Damage due to improper assembly or follow-up maintenance or lack of skill, competence or experience of user.

Products that have been modified, neglected, used in competition or for commercial purposes, misused or abused, involved in accidents or anything other than normal use.

Damage or deterioration to the surface finish, aesthetics or appearance of the product.

Normal wear and tear.

Labor required to remove and/or refit and re-adjust the product within the bicycle assembly.

This warranty gives the consumer specific legal rights, and those right and other rights may vary from state to state.

We recommend professional installation.
