Winwood DeeDee 29" Carbon Suspension Fork

Punker. Introducing the Winwood DeeDee. A non-conformist to the hardcore. Not only a 29-incher, but a carbon-wrapped suspension fork, at that. Odd? Maybe, but DeeDee hands you much less bushing slop than other forks on the market--tracking lines with fierce precision. The simple, solid design makes the DeeDee very adjustable and offers more than its fair share of tuning options. It even comes in two models: air and coil. Maintaining dampers is a breeze, which helps keep the costs down on what's already an affordable 29" punker.

Gabba gabba hey.

Features

- 7050 aluminum 30mm stanchions
- ISO disc and cantilever bosses
- One-piece carbon lowers with grease injection ports
- Air spring or coil spring/MCU
- Lockout
- 85mm travel
